

UNIVERSAL STORAGE II

Created by DMagic, Paul Kingtiger and Simon Hinton

MANUAL INSTALL

- Unzip the downloaded file
- Copy the contents to your KSP/Game Data folder

If updating the mod simply follow the process above and overwrite any files.

AVC ONLINE

The mod includes an AVC version check file. The first time you run KSP with Universal Storage installed you will be asked if you want to enable version checking.

Enabling will let the mod compare your version file to the current version via the AVC website and alert you if there is a more up to date version available. AVC is opt-in and does not collect or share any private data.

RECOMMENDED MODS

Universal Storage is best enjoyed with other mods. Additional parts and functionality will be automatically enabled to give you the complete experience. We recommend the following 3rd party mods.

Kerbal Inventory System (KIS)

With KIS installed you will be able to detach, carry and reattach wedges on EVA. You'll also get access to some KIS specific parts.

DMagic Orbital Science

This amazing mod adds lots of new science parts and contracts, giving you lots of opportunities to advance Kerbal knowledge. The Orbital Science mod includes several wedge compatible experiments which can be attached to Universal Storage cores.

Life support mods

All the popular life support mods are supported with wedge resource tanks and processors.

- Kerbalism
- Snacks
- TAC Life Support
- USI Life Support

Connected Living Space

The Hex and Octo cores include variants with a crew transfer tunnel and are fully connective living space compatible, allowing transfer through the craft. The ADC and shrouds will also allow crew transfer.

Community resource pack

Universal Storage uses CRP resources and will work with any other CRP mod.

CREDITS

- Universal Storage is created by DMagic, Paul Kingtiger and Simon Hinton (Daishi)
 - Universal Storage module code built on the work of Snjo and Firespitter, without their work this wouldn't be possible.
 - Italian translation provided by Carlo Rossi
 - Module Manager created by Sarbian and Blowfish
 - AVC online created by Cybutek
-
